## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Amendment, filed 6/11/08, with respect to the 102 rejection over US 2006/0075418 have been fully considered and are persuasive. The 102 rejection of claims 1-33 has been withdrawn.

Applicant's arguments in regard to the Double patenting rejection filed 6/11/08 have been fully considered but they are not persuasive. Applicant argues that the Double patenting rejection should be withdrawn because the claims of the two applications are not the same, i.e the specification is improperly used. However, as stated in MPEP 804 (II) , "The specification can be used as a dictionary to learn the meaning of a term in the patent claim. *Toro Co. v. White Consol. Indus., Inc.*, 199 F.3d 1295, 1299, 53 USPQ2d 1065, 1067 (Fed. Cir. 1999)... Further, those portions of the specification which provide support for the patent claims may also be examined and considered when addressing the issue of whether a claim in the application defines an obvious variation of an invention claimed in the patent." While the application does not claim that the nano-elements are luminescent, the materials disclosed are the same. Therefore, they would also be capable of luminescence.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1794

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-33 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-44 of copending Application No. 10/537,879. Although the conflicting claims are not identical, they are not patentably distinct from each other because they cover the same recording medium formed of nano-elements.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-33 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 24-25 of copending Application No. 10/561,861. Although the conflicting claims are not identical, they are not patentably distinct from each other because they cover the same recording medium comprising nano-elements. It is recognized that the claims of the copending application do not specify that the nano-elements are capable of luminescence. However, when looking to the specification in support of the claims to further define the nano-elements, the specification defines the nano-elements as being formed of carbon. As the same materials are disclosed, they would inherently have the same properties. Further, the method of recording is identical.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
